

# Description

**Nilifam-815-M4** is designed for use as an anticorrosive and inhibitive fast-drying primer based on long oil alkyd resin and zinc phosphate as inhibitive pigment with a good anticorrosive efficiency in mild to moderate environment.

Nilifam-815-M4 can be applied as an inhibitive primer on blasted steel structure.

## **Recommended use**

Adhesion Corrosion resistance Temperature resistance

RAL NO

Good to both grit blasted and manually prepared surfaces. Good on correctly prepared surfaces. Dry: Maximum 90°C

15 days Max. 350 gr/l

# **Application details**

Conditions	Do not apply when relative humidity exceeds 80% or when the surface to be coated is less than 3°C above the dew point.			
Method	Airless spray	Air spray	Brush (touch-up)	
Thinner (max. vol.) Spray setting	NF-T-8 (5-10%)	NF-T-8 (10-15%)	NF-T-8 (5%)	
Pump ratio minimum	30:1			
Tip size	021"	1.8mm		
Tip pressure	150 bar/2200 Psi	4 – 5 bar		
	(Airless spray data are indicative and subject to adjustment)			
Cleaning of tools	NF-T-8			
Indicated film thickness, dry	60 microns			
Indicated film thickness, wet	100 microns

# ALKIFOS NF-815-M4 Curing Agent: None

Surface preparation Steel surface should ideally be abrasive blast cleaning to minimum Sa 2½. The surface must be completely clean and dry prior to application. And its temperature must be above the dew point to avoid condensation Packaging (typical) Mass (Kg) Size of containers (litres) Alkifos 20 20 Storage & handling The product must be stored in accordance with national regulations. Keep the containers in a dry, cool, well ventilated space and away from sources of heat and ignition. Containers must be keep tightly closed. Handle with care. Shelf-life Alkifos 12 month(s) In some markets commercial shelf life can be dicated shorter by local legislation. The above is minimum shelf life, thereafter the paint quality is subject to re-inspection. Remarks **Preceding Coat** None. Subsequent AIR DRYING ALKYD INTER MEDIATE OR TOP COAT. Coat Film thickness May be specified in another film thickness than indicated depending on purpose and area of use. This will alter spreading rate and may influence drying time and recoating intervals. Normal range is 50-75 microns/ 2-3 mils The type and amount of thinner depend on application conditions, Thinning application method, temperature, ventilation, and substrate. Thinner NF-T-8 is recommended in general Recoating/Drying/ None. **Curing Time** Physical data versus temperatures: Surface temperature 5°C/41°F 10°C/50°F 20°C/68°F 30°C/86°F Dry to touch approx. 12 hours 6 hours 3 hours 2 hours. Resist condensing humidity/ 4 days 2 days 48 hours 24 hours light showers after Fully cured 20 days 14 days 15 days 10 days Recoating interval with Min 24 hours 16 hours 8 hours 4 hours None alkyd intermediate Max None None None

#### Caution

This product is for professional use only. The applicators and operators shall be trained, experienced and have the capability and equipment to mix/stir and apply the coatings correctly and according to Nilifam's technical documentation. Applicators and operators shall use appropriate personal protection equipment when using this product. This guideline is given based on the current knowledge of the product. Any suggested deviation to suit the site conditions shall be forwarded to the responsible Nilifam representative for approval before commencing the work.

### Safety

Handle with care. Before and during use, observe all safety labels on packaging and paint containers, consult Nilifam material safety data sheets and follow all local and national safety regulations. Harmful or fatal if swallowed; immediately seek medical assistance. Avoid inhalations of possible solvent vapors or paint mist, as well as paint contact with skin and eyes. Apply only on well-ventilated areas and ensure that adequate forced ventilation exists when applying paint in confined spaces or when the air is stagnant. Always take precautions against the risks of fire and explosions
