

Description

Nilifam-134-MT is a high-build, modified, two-component epoxy paint, which cures to a coating with good resistance to water, splashes of mineral oils, aliphatic hydrocarbons, and to abrasion and impact. Limited resistance to aromatic and stronger solvents and to acids and oxidizing materials.

Nilifam-134-MT As a top coat with no maximum recoating interval in Epoxy/Polyurethane systems.

Curing agent NF-134-MT-CA, polyamide, is typically for use above 5°C/41°F.

Recommended use

Excellent to primed surfaces Adhesion

Corrosion resistance Excellent on correctly primed surfaces

Dry: Maximum 140 °C. At service temperatures above 120°C/248°F, Temperature resistance

slight discoloration may be expected.

Physical constants

RAL NO Colours/shade: Matt Finish: 60±5

Volume solids, %: 14 m²/l - 100 Mic.

Theoretical spreading rate:

28°C Flash point:

1.50±0.15 kg/l Specific gravity:

3-4 hours at 20°C Dry to touch:

(Initial)

6-7 hours hardness: 7 days Fully cured: Max. 280 gr/l **VOC** content:

Application details

Conditions Do not apply when relative humidity exceeds 80% or when the surface to be coated is less than

3°C above the dew point.

Method Airless spray Brush (touch-up) Thinner (max. vol.) NF-T-1 (10-20%) NF-T-1 (5%) Spray setting

Pump ratio minimum 40:1

0.021"-0.019" Tip size Tip pressure 150 bar/2100 Psi

(Airless spray data are indicative and subject to adjustment)

Cleaning of tools NF-T-1 Indicated film thickness, dry 60 microns Indicated film thickness, wet 100 microns

NIPOXI NF-134-MT

Curing Agent:NF-134-MT-CA

Surface preparation

Steel surface should ideally be abrasive blast cleaning to minimum Sa $2\frac{1}{2}$. The surface must be completely clean and dry prior to application. And its temperature must be above the dew point to avoid condensation

| Packaging (typical) | Mass (Kg) | Size of containers (litres) |
|---------------------|-----------|-----------------------------|
| Nipoxi comp A | 20 | 20 |
| Nipoxi comp B | 3.6 | 4 |

| Mixing | Mixing ratio (by weight) | Nipoxi comp A | Nipoxi comp B | |
|--------|--------------------------|----------------------|---------------|--|
| | | 100 | 18 | |
| | Pot life | 4 hours (20°C/ 68°F) | | |

Storage & handling

The product must be stored in accordance with national regulations. Keep the containers in a dry, cool, well ventilated space and away from sources of heat and ignition. Containers must be keep tightly closed. Handle with care.

Shelf-life

Nipoxi comp A 12 month(s) Nipoxi comp B 12 month(s)

In some markets commercial shelf life can be indicated shorter by local legislation. The above is minimum shelf life, thereafter the paint quality is subject to re-inspection.

Preceding Coat Epoxy primers such as NF-114-M10 and Epoxy intermediate such

as NF-124.

Subsequent Coat

Thinning

None.

Film thickness

May be specified in another film thickness than indicated

depending on purpose and area of use.

This will alter spreading rate and may influence drying time and recoating intervals. Normal range is 100-150 microns/ 4-6 mils. The type and amount of thinner depend on application conditions, application method, temperature, ventilation, and substrate.

Thinner NF-T-1 is recommended in general.

Recoating/Drying/ Curing Time Recoating intervals related to later conditions of temperature:

(75 micron/3 mils dry film thickness of NF-134)

Physical data versus temperatures:

| | Friysical data versus temperatures. | | | | | |

NIPOXI NF-134-MT

Curing Agent:NF-134-MT-CA

Caution

This product is for professional use only. The applicators and operators shall be trained, experienced and have the capability and equipment to mix/stir and apply the coatings correctly and according to Nilifam's technical documentation. Applicators and operators shall use appropriate personal protection equipment when using this product. This guideline is given based on the current knowledge of the product. Any suggested deviation to suit the site conditions shall be forwarded to the responsible Nilifam representative for approval before commencing the work.

Safety

Handle with care. Before and during use, observe all safety labels on packaging and paint containers, consult Nilifam material safety data sheets and follow all local and national safety regulations. Harmful or fatal if swallowed; immediately seek medical assistance. Avoid inhalations of possible solvent vapors or paint mist, as well as paint contact with skin and eyes. Apply only on well-ventilated areas and ensure that adequate forced ventilation exists when applying paint in confined spaces or when the air is stagnant. Always take precautions against the risks of fire and explosions
