

Description

Nilifam 134-GF is a two component, high solid glass flake pigmented polyamine cured epoxy paint with good wetting properties and low water permeability. It is self-priming and forms a hard and tough coating which has good resistance against abrasion and impact as well to sea water, mineral oil, aliphatic hydrocarbons and splashes from petrol jet fuel. **Nilifam 134-GF** has very good adhesion and chemical resistance.

Recommended use

Adhesion Excellent to primed surfaces

Corrosion resistance Excellent on correctly primed surfaces

Temperature resistance Dry: Maximum 140 °C. At service temperatures above 120°C/248°F,

slight discoloration may be expected.

Physical constants

Colours/shade: RAL NO Gloss Finish: 82±5

Volume solids, %: 82±5 1.3 m²/l - 500 Mic.

Theoretical spreading rate: 1.3 m²/l - 500 MIG

Flash point: 25°C

Specific gravity: 1.70±0.15 kg/l

Dry to touch: Max.1 hour at 20°C

 (Initial)
 24 hours

 hardness:
 7 days

 Fully cured:
 Max. 250 gr/l

Application details

Conditions Do not apply when relative humidity exceeds 80% or when the surface to be coated is less than

3°C above the dew point.

MethodAirless sprayBrush (touch-up)Thinner (max. vol.)NF-T-1 (10-20%)NF-T-1 (5%)

Spray setting

Pump ratio minimum 30:1

 Tip size
 0.045"-0.048"

 Tip pressure
 250 bar/3600 Psi

(Airless spray data are indicative and subject to adjustment)

Cleaning of tools NF-T-1
Indicated film thickness, dry 82 microns
Indicated film thickness, wet 100 microns

NIFLAK NF-134-GF

Curing Agent:NF-134-GF-CA

Surface preparation

Steel surface should ideally be abrasive blast cleaning to minimum Sa 21/2. The surface must be completely clean and dry prior to application. And its temperature must be above the dew point to avoid condensation

| Packaging (typical) | | Mass (Kg) | Size of containers (litres) |
|---------------------|---------------|-----------|-----------------------------|
| | Niflak comp A | 20 | 20 |
| | Niflak comp B | 3.2 | 4 |

Mixing Mixing ratio (by weight) Niflak comp A Niflak comp B 100 16 Pot life 3 hours (20°C/68°F)

Storage & handling

The product must be stored in accordance with national regulations. Keep the containers in a dry, cool ventilated space and away from sources of heat and ignition. Containers must be keep tightly closed. Handle with care.

Shelf-life

Niflak comp A 12 month(s) Niflak comp B 12 month(s)

In some markets commercial shelf life can be indicated shorter by local legislation. The above is minimum shelf life, thereafter the paint quality is subject to re-inspection.

Remarks

Preceding Coat Epoxy primers such as NF-114-GF and Epoxy intermediate such

as NF-124-GF.

Subsequent Coat

Thinning

None.

Film thickness

May be specified in another film thickness than indicated

depending on purpose and area of use.

This will alter spreading rate and may influence drying time and recoating intervals. Normal range is 450-500 microns/ 18-20 mils. The type and amount of thinner depend on application conditions,

application method, temperature, ventilation, and substrate. Thinner 1051 is recommended in general

Recoating/Drying/ **Curing Time**

Recoating intervals related to later conditions of temperature:

(500 micron/20 mils dry film thickness of NF134GF)

| Physical data versus temperatures: | | | | | | | |

Caution

This product is for professional use only. The applicators and operators shall be trained, experienced and have the capability and equipment to mix/stir and apply the coatings correctly and according to Nilifam's technical documentation. Applicators and operators shall use appropriate personal protection equipment when using this product. This guideline is given based on the current knowledge of the product. Any suggested deviation to suit the site conditions shall be forwarded to the responsible Nilifam representative for approval before commencing the work.

Safety

Handle with care. Before and during use, observe all safety labels on packaging and paint containers, consult Nilifam material safety data sheets and follow all local and national safety regulations. Harmful or fatal if swallowed; immediately seek medical assistance. Avoid inhalations of possible solvent vapors or paint mist, as well as paint contact with skin and eyes. Apply only on well-ventilated areas and ensure that adequate forced ventilation exists when applying paint in confined spaces or when the air is stagnant. Always take precautions against the risks of fire and explosions
