

Description

Nilifam-123-FC is a high-build, modified two-component epoxy paint, which cures to coating with good resistance to water, splashes of mineral oils, aliphatic hydrocarbons, and to abrasion and impact. Limited resistance to aromatic and stronger solvents and to acids and oxidizing materials.

Nilifam-123-FC As an intermediated with recoating interval in Epoxy/Polyurethane systems. Curing agent NF-123-FC-CA, polyamine, is typically for use above 5°C/41°F.

Recommended use

AdhesionExcellent to both primed & grit blasted and manually prepared steel
surfaces (5A).Corrosion resistanceExcellent on correctly prepared steel surfaces and primed concrete
surfaces.Temperature resistanceDry: Maximum 120°C

Physical constants

Colours/shade:	RAL NO (limited)
Finish:	Flat
Volume solids, %:	99±5
Theoretical spreading rate:	0.95 m²/l - 1000 Mic.
Flash point:	28°C
Specific gravity:	1.80±0.15 kg/l
Dry to touch:	4 hours at 20°C
(Initial) hardness: Fully cured: VOC content:	1 days 7 days Max. 60 gr/l

Application details

Conditions	Do not apply when relat 3°C above the dew poin	ive humidity exceeds 80% or when the surface to be coated is less than			
Method Thinner (max. vol.) Spray setting	Airless spray	Brush (touch-up)			
Pump ratio minimum Tip size	40:1 0.021"-0.019"				
Tip pressure	150 bar/2100 Psi				
	(Airless spray data are indicative and subject to adjustment)				
Cleaning of tools	NF-T-1				
Indicated film thickness, dry	950 microns				
Indicated film thickness, wet	1000 microns				

MASTOPOXZ NF-123-FC Curing Agent:NF-123-FC-CA

Surface preparation

Steel surface should ideally be abrasive blast cleaning to minimum Sa 2½. The surface must be completely clean and dry prior to application. And its temperature must be above the dew point to avoid condensation

Caution

This product is for professional use only. The applicators and operators shall be trained, experienced and have the capability and equipment to mix/stir and apply the coatings correctly and according to Nilifam's technical documentation. Applicators and operators shall use appropriate personal protection equipment when using this product. This guideline is given based on the current knowledge of the product. Any suggested deviation to suit the site conditions shall be forwarded to the responsible Nilifam representative for approval before commencing the work.

Safety

Handle with care. Before and during use, observe all safety labels on packaging and paint containers, consult Nilifam material safety data sheets and follow all local and national safety regulations. Harmful or fatal if swallowed; immediately seek medical assistance. Avoid inhalations of possible solvent vapors or paint mist, as well as paint contact with skin and eyes. Apply only on well-ventilated areas and ensure that adequate forced ventilation exists when applying paint in confined spaces or when the air is stagnant. Always take precautions against the risks of fire and explosions
