

Description

Nilifam-113-AS is a modified two-component conductive epoxy primer, which cures to coating with antistatic properties and good resistance to water, splashes of mineral oils, aliphatic hydrocarbons, and to abrasion and impact. Limited resistance to aromatic and stronger solvents and to acids and oxidizing materials.

Curing agent NF-113-AS-CA, polyamide, is typically for use above 5°C/41°F.

Recommended use

Adhesion

Corrosion resistance Temperature resistance Excellent to both primed & grit blasted and manually prepared steel and concrete surfaces (5A). Excellent on correctly prepared steel surfaces and *primed* surfaces. Dry: Maximum 120°C

Physical constants

Colours/shade:	Clear
Finish:	Flat
Volume solids, %:	35±5
Theoretical spreading rate:	4 m²/l
Flash point:	28°C
Specific gravity:	0.98±0.15 kg/l
Dry to touch:	3-4 hours at 20°C
(Initial) hardness: Fully cured: VOC content:	1 day 7 days Max. 60 gr/l

Application details

Conditions	Do not apply when relative humidity exceeds 80% 3°C above the dew point.	or when the surface to be coated is less than
Method Thinner (max. vol.) Spray setting	Airless spray	Brush (touch-up)
Pump ratio minimum Tip size Tip pressure	40:1 0.021"–0.019" 150 bar/2100 Psi	
Cleaning of tools Indicated film thickness, dry Indicated film thickness, wet	NF-T-1 35 microns 100 microns

NIPOSTATIC NF-113-AS Curing Agent: NF-113-AS-CA

Surface preparation

Steel surface should ideally be abrasive blast cleaning to minimum Sa $2\frac{1}{2}$. The surface must be completely clean and dry prior to application. And its temperature must be above the dew point to avoid condensation

NILIFAM PDS

NIPOSTATIC NF-113-AS Curing Agent: NF-113-AS-CA

Caution

This product is for professional use only. The applicators and operators shall be trained, experienced and have the capability and equipment to mix/stir and apply the coatings correctly and according to Nilifam's technical documentation. Applicators and operators shall use appropriate personal protection equipment when using this product. This guideline is given based on the current knowledge of the product. Any suggested deviation to suit the site conditions shall be forwarded to the responsible Nilifam representative for approval before commencing the work.

Safety

Handle with care. Before and during use, observe all safety labels on packaging and paint containers, consult Nilifam material safety data sheets and follow all local and national safety regulations. Harmful or fatal if swallowed; immediately seek medical assistance. Avoid inhalations of possible solvent vapors or paint mist, as well as paint contact with skin and eyes. Apply only on well-ventilated areas and ensure that adequate forced ventilation exists when applying paint in confined spaces or when the air is stagnant. Always take precautions against the risks of fire and explosions
