

Description

Nilifam-242 is a two-component, gloss acrylic polyurethane coating with good gloss and color retention.

Nilifam-242 As a finishing coat for protection of structural steel in severely corrosive atmospheric environment, where light-fastness and gloss retention are required. Minimum temperature for curing is 10°C/14°F.

Recommended use

Adhesion Corrosion resistance Temperature resistance Excellent to primed surfaces. Excellent on correctly prepared and primed steel surfaces Dry: Maximum 120°C. At service temperatures above 100°C/212°F, slight discoloration may be expected.

Physical constants

NIPOLIVAR NF-242 Curing Agent:NF-242-CA

Surface preparation

Steel surface should ideally be abrasive blast cleaning to minimum Sa $2\frac{1}{2}$. The surface must be completely clean and dry prior to application. And its temperature must be above the dew point to avoid condensation

Caution

This product is for professional use only. The applicators and operators shall be trained, experienced and have the capability and equipment to mix/stir and apply the coatings correctly and according to Nilifam's technical documentation. Applicators and operators shall use appropriate personal protection equipment when using this product. This guideline is given based on the current knowledge of the product. Any suggested deviation to suit the site conditions shall be forwarded to the responsible Nilifam representative for approval before commencing the work.

Safety

Handle with care. Before and during use, observe all safety labels on packaging and paint containers, consult Nilifam material safety data sheets and follow all local and national safety regulations. Harmful or fatal if swallowed; immediately seek medical assistance. Avoid inhalations of possible solvent vapors or paint mist, as well as paint contact with skin and eyes. Apply only on well-ventilated areas and ensure that adequate forced ventilation exists when applying paint in confined spaces or when the air is stagnant. Always take precautions against the risks of fire and explosions
