

Description

Nilifam-242-FC is a two-component, gloss acrylic polyurethane coating with good gloss and color retention.

Nilifam-242-FC As a finishing coat for protection of epoxy/polyurethane floor coating systems, where light-fastness and gloss retention are required. Minimum temperature for curing is -10° C/14°F.

Recommended use

Adhesion Corrosion resistance Temperature resistance Excellent to primed surfaces. Excellent on correctly prepared and primed concrete surfaces Dry: Maximum 120°C. At service temperatures above 100°C/212°F, slight discoloration may be expected.

Physical constants

Colours/shade: Finish: Volume solids, %: Theoretical spreading rate:

Flash point: Specific gravity:

Dry to touch: (Initial) hardness: Fully cured: VOC content: Clear Full Gloss 90±5 11.3 m²/lit 30 Mic.

32°C 1.00±0.10 kg/l

Max.4 hours at 20°C

24 hours 7 days Max. 250 gr/l

Application details

Conditions Method Thinner (max. vol.)		ive humidity exceeds 80% or when the surface to °C above the dew point. Brush (touch-up) NF-T-2 (5%)
Spray setting Pump ratio minimum Tip size Tip pressure	30:1 0.017"-0.019" 150 bar/2100 Psi (Airless spray data are i	ndicative and subject to adjustment)
Cleaning of tools Indicated film thickness, dry Indicated film thickness, wet	NF-T-2 90 microns 100 microns

NIFOLIVAR NF-242-FC Curing Agent:NF-242-FC-CA

Surface preparation

Steel surface should ideally be abrasive blast cleaning to minimum Sa $2\frac{1}{2}$. The surface must be completely clean and dry prior to application. And its temperature must be above the dew point to avoid condensation

Caution

This product is for professional use only. The applicators and operators shall be trained, experienced and have the capability and equipment to mix/stir and apply the coatings correctly and according to Nilifam's technical documentation. Applicators and operators shall use appropriate personal protection equipment when using this product. This guideline is given based on the current knowledge of the product. Any suggested deviation to suit the site conditions shall be forwarded to the responsible Nilifam representative for approval before commencing the work.

Safety

Handle with care. Before and during use, observe all safety labels on packaging and paint containers, consult Nilifam material safety data sheets and follow all local and national safety regulations. Harmful or fatal if swallowed; immediately seek medical assistance. Avoid inhalations of possible solvent vapors or paint mist, as well as paint contact with skin and eyes. Apply only on well-ventilated areas and ensure that adequate forced ventilation exists when applying paint in confined spaces or when the air is stagnant. Always take precautions against the risks of fire and explosions
